

about INFODESIGN

INFODESIGN d.o.o. Varazdin is Croatian company specialised in designing, producing and installing information systems, providing complete and integrated solutions to its customers, from consulting services, training and education, computer hardware and network installation, operating system support, applications design, development, deployment and maintenance.

Established in 1991 by people with long-term experience in building applications for end-users, INFODESIGN has grown up into a professional organisation with 15 employees, over 20 outsource developers that are employed on occasional basis and more then **150 customers in Europe, South and Central America and South Africa**. Its business orientation is to take a personal approach to customer relationship. With its presence in professional publications, at specialised fairs and trade shows, organising users meetings and conferences, INFODESIGN enables users to keep up to date with the latest information technology.

INFODESIGN's strength and success lies in its high level of services, support and value added solutions. Company deals with a number of leading, world-wide known companies such as HP as Value Added Reseller (VAR). INFODESIGN is also CIS-CO reseller, authorised Microsoft dealer, BusinessObjects partner for business intelligence solutions and exclusive **PROGRESS SOFTWARE** distributor for Croatia covering also markets in Slovenia and Bosnia-Herzegovina.

Company's activities are divided in two lines: sales/marketing and application software development. Sales/marketing line acts on the field of direct sales, marketing and engineering of computer technology with aim to create and develop the market for INFODESIGN's applications. Line for application software development provides all necessary software support and services for end users. Using the latest programming tools such as Computer Associates **BPwin** for business process modelling, **ERwin** for database modelling, **PROGRESS SOFTWARE** RDBMS and **OpenEdge Studio** Application

Development Environment, and BusinessObjects for business intelligence, INFODESIGN has developed wide range of applications systems for different vertical lines of business such as automotive, manufacturing, retail, transportation and insurance. These applications cover the following areas: **Purchase Order Processing, Purchase Ledger, Stock Control, Fixed Assets, Manufacturing, Sales Order Processing, Invoicing, Sales Ledger, General Ledger, Payroll and Human Resources, Management Information System**.

Applications are written in **PROGRESS 4GL** and are using Relational Database Management System to store data. They can run on **any platform**, like **Windows Servers**, any Unix platform or AS/400 servers in Client/Server, Host/Terminal or mixed environment under graphical or character user interface. They are ready to be **Web-enabled**. Simple interfaces are available to allow data to be transferred between these applications and industry standard office automation packages, such as word processing, spreadsheets and business graphics.

Important fact to mention is also the low cost of ownership. For the second year **Aberdeen Group** reports that the Progress Software OpenEdge platform, when compared with Microsoft's and Oracle's embedded infrastructure (database, application server and management tools), provides **dramatically lower Visible Cost of Ownership (VCO)**. In fact, Progress was one-tenth the cost of the Oracle, and fifty percent of the Microsoft embedded infrastructure.

If you are looking for efficient business system, you will need a suitable information system based on the latest technology. Our experience and our solutions will help you to keep development and rating of your company at the highest level. Let us know your needs and we will suggest solutions and present our applications.
